The subject matters of claims 1-5 appear to be novel and to involve an inventive step, since they are not described in any of documents 1-8 cited in the ISR. Especially, none of the documents describes a constitution in which a silica-aluminum- based inorganic polymer flocculating agent having a Si/Al molar ratio of 0.2 to 1.5 is used as a flocculating agent for papermaking waste water, and a person skilled in the art could not have easily conceived of the constitution.
